

# WebAccess+IMM

## (Interactive Multimedia Software)

## Web-based Digital Signage Content Management System

### Features

- Server-client architecture for remotely managing signage programs
- Edit and dispatch programs within 3 steps with an easy-to-use interface
- Supply more than 10 media materials
- Support multi-screen displays
- Provide remote device management
- Offer system backup and recovery

## Introduction

Advantech interactive multimedia software WebAccess+IMM, provides the platform for editing and dispatching digital signage programs. WebAccess+IMM allows users to manage and display dynamic, tailored messages which increases sales in real time.

## Feature Details

### Server-client architecture

WebAccess+IMM adopts a server-client architecture. Users can easily manage signage programs through web-browser. A single server can manage up to 500 players/clients (If you would like to connect more than 500 clients, please contact our sales representative.).

### User-friendly interface

WebAccess+IMM allows users to edit and dispatch signage programs in 3 steps by simply drag-and-drop.

### Rich media formats

TV/ Webpage/ Flash/ PPT/ Scrolling/ Time

Image: JPG/ GIF/ BMP/ PNG

Video: AVI/ WMV/ MPEG/ MKV/ MP4/ FLV/ MOV (depends on Codec)

### Multi-screen display

WebAccess+IMM supports multi-screen displays up to 16 screens and full HD (1080p) to each screen. Program zones can span multiple screens.

### Device monitoring and power management

Users can easily monitor each player screenshot and device status. Furthermore, it provides remote power on/off functions.

### System backup and recovery

WebAccess+IMM offers a backup function for multimedia files, program data, and system settings. The backup data can be restored by a single mouse click.
