Abstract	How to adjust BIOS to install OS on mSATA		
Keyword	mSATA		
Related Product	UNO-2271G		

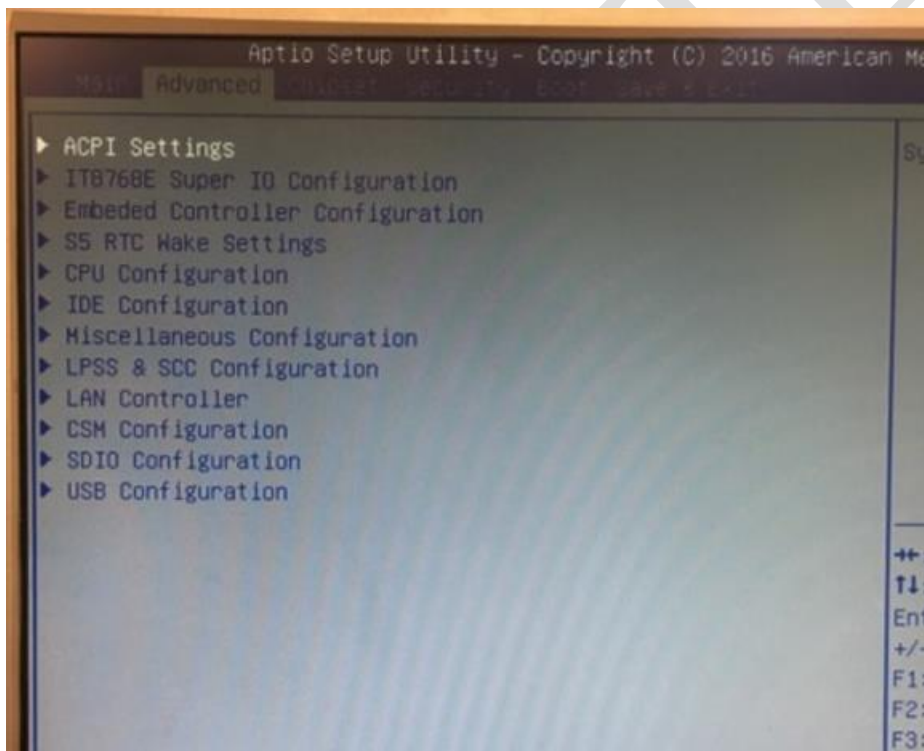

### ■ Problem Description:

Users get to use the mSATA as the primary storage for OS installation.

### ■ Brief Solution - Step by Step:

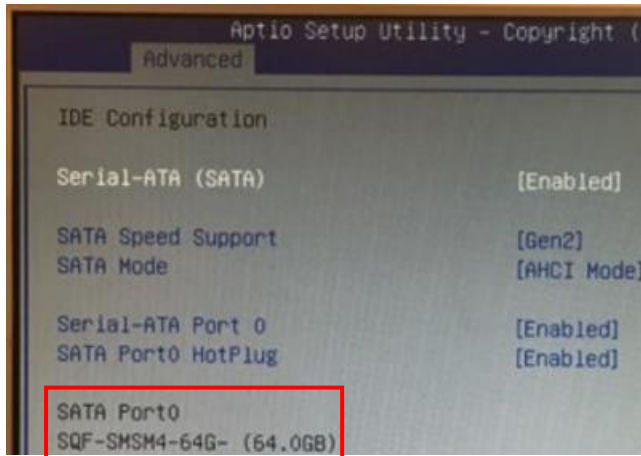

#### Step1

Press **Del** to enter to the BIOS, and under **Advanced**, go to **IDE Configuration**.

### Step2

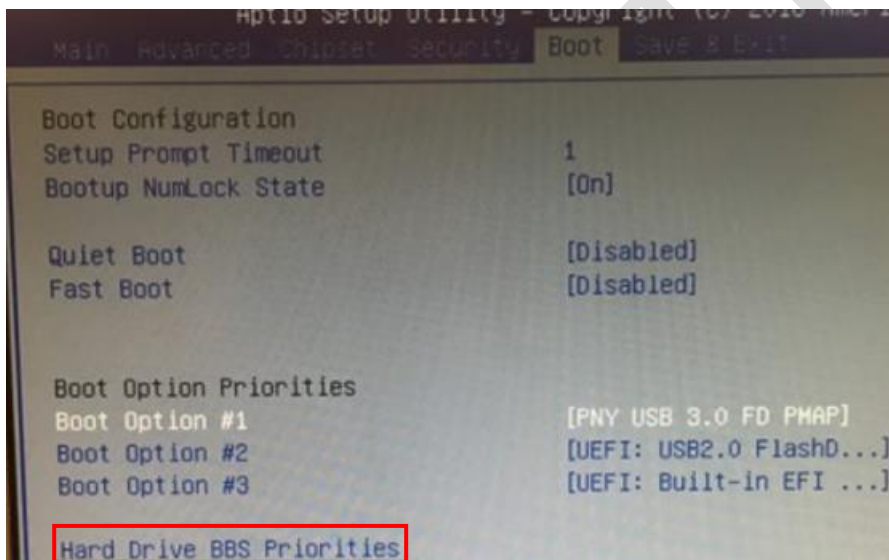

Enable **Serial-ATA (SATA)**, you should something like below. The mSATA is able to be recognized.

Save and reset.

### Step3

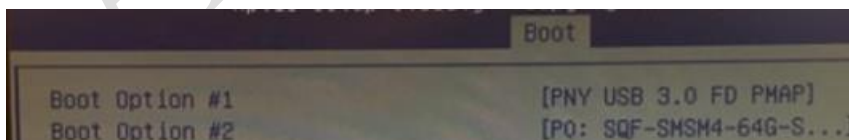

Go to **Boot – Hard Drive BBS Priorities**

And adjust to

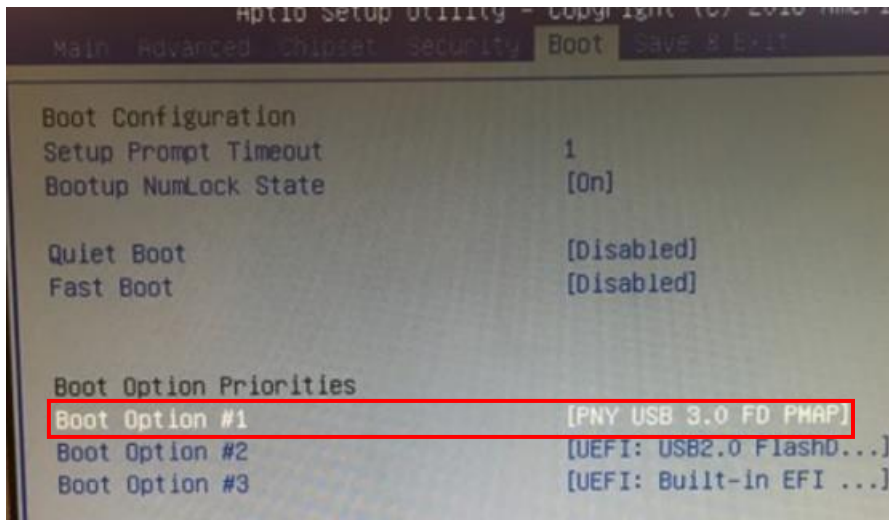

Boot Option #1 will be your installation media, for example USB boot up disk.

Boot Option #2 will be your mSATA.

**Step4**

Press ESC and you should see something like this

Where your Boot Option #1 should be your installation media.
