Abstract	CODESYS, How to show more properties in CODESYS visualization?		
Keyword	CODESYS, Visualization		
Related Product	APAX-5580CDS		

■ Problem Description:

This document shows how to show more properties in CODESYS visualization.

■ Answer:

Each object in visualization has the plenty of properties. Take inputconfiguration as example, it has the following event defined for button on CODESYS official document:

Inputconfiguration	
OnDialogClosed	Configure...
OnMouseClicked	Configure...
OnMouseDown	Configure...
OnMouseEnter	Configure...
OnMouseLeave	Configure...
OnMouseMove	Configure...
OnMouseUp	Configure...

However, sometimes IDE doesn't show all of events in the properties.

Inputconfiguration	
OnMouseDown	Configure...
OnMouseUp	Configure...

The reason is that the default IDE is just showing the common properties and hides the others. Please check "Advanced" to show them all

Properties	
Filter	Sort by
Sort order	Advanced
Property	Value
State variables	
Inputconfiguration	
OnDialogClosed	Configure...
OnMouseClicked	Configure...
OnMouseDown	Configure...
OnMouseEnter	Configure...
OnMouseLeave	Configure...
OnMouseMove	Configure...
OnMouseUp	Configure...
Toggle	
Tap
