Problem Description & Architecture:

This FAQ instructs user how to use https to access Dashboard2.0

Brief Solution - Step by Step:

Step1: open C:\Inetpub\wwwroot\broadweb\WADashboard\server.conf Replace string {"server":{"port":443 as server:{port:10888 Replace string "tls":{"enable":false as "tls":{"enable":true

Step2: create a folder ex: D:\temp , copy C:\WebAccess\Node\cert\private\WaCert.pem to D:\temp , rename WaCert.pem as private.pem, copy and replace private.pem to C:\Inetpub\wwwroot\broadweb\WADashboard\example\ssl\private.pem (note: backup original private.pem)

Step3: copy C:\WebAccess\Node\cert\certs\WaCert.pem to D:\temp ,
 rename WaCert.pem as cert.pem,
 copy and replace cert.pem to
 C:\Inetpub\wwwroot\broadweb\WADashboard\example\ssl\cert.pem
 (note: backup original cert.pem)

Step4:use administrator to excute C:\Inetpub\wwwroot\broadweb\WADashboard\dashboard_stop.exe use administrator to excute C:\Inetpub\wwwroot\broadweb\WADashboard\dashboard_start.exe

Enabling an Intelligent Planet

Step5: You will see IE use https://localhost:10888/WADashboard/dashboardViewer to access
