■ **Problem Description:**

This document shows what's the rule to download the Javascript file?

■ **Answer:**

For the ADAM-6200 and ADAM-6000, the user can import their own HTML and Javascript file to make their own user interface. However, the name of the Javascripts file is restricted. It must be called "adam.js". The following is showed how to do this.

1. There are two files. One is HTML and another is Javascript file. The name of Javascript file must be "adam.js"

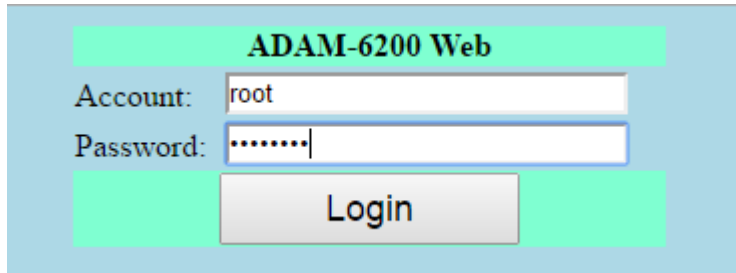

2. The content of HTML

3. The content of "adam.js"

```
adam.js
1  alert('Hello, World!')
2
```

4. Log in the ADAM
