Abstract	WISE-4051, Can WISE-4051 be a Modbus RTU gateway?		
Keyword	WIFI, Modbus RTU, Modbus TCP		
Related Product	WISE-4051		

■ Problem Description:

This document explains that why WISE can't be a Modbus RTU gateway.

■ Answer:

The answer is yes.

WISE-4051 is a Modbus RTU master polling the data from the Modbus RTU devices and maps the value to its own Modbus address. The PLC/PC can get/control the data from the corresponding address by Modbus TCP. Therefore, WISE-4051 can be Modbus gateway to translate Modbus RTU to Modbus TCP.
