

REACH Compliance Certificate

Dear Customer,

REACH requires "registration of all substances that are intended to be released from articles during normal and reasonably foreseeable conditions of use". An article is defined as "an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition." Products built by B&B are articles as defined by REACH and the substances (i.e. substances on the 'candidate list') in those products (IF PRESENT) are not intended to be released during normal operation or in any "reasonably foreseeable" conditions, therefore these products do not have to be registered under REACH.

B&B's material disclosure on products is based on information provided by our suppliers. Regarding the presence of SVHC chemicals, our suppliers do not provide information to the extent you require. Neither B&B performs or offers this level of product testing.

Sincerely,

Courtney Graham
