

# AIM-8I BCR SOP

Prepared by SloT Team

(2019/03/13)

## Environment setup

- Windows 10 IoT 64bit
- BCR Module
- MediumText.exe

**✖Please install it before power on.**

1. Environment setup. Tweezer, screwdriver, AIM-8I and BCR module.

2. Remove 4 cover stickers by tweezer.

3. Remove 4 screws by screwdriver.

4. Lock the BCR module by 4 screws and paste back 4 stickers.

5. Click "Trigger" to trigger the barcode.

6. Scan the barcode after triggering the BCR module. If scan successfully, the barcode number will be showed under the window of Text File.

7. For MSR function, we can prepare a card with NFC, and then swipe the card. (Please note that the speed should be moderate, please don't be too fast or too slow.)

8. If reaction successfully, the number will be showed under the window of Text File.
