Abstract	How to solve customer's own develop program can't boot start		
Keyword	own develop program, DCTagSDK, API		
Related Product	ADAM-3600, ECU-1152, ECU-1251, ECU-1051		

- **Problem Description:**

    Customer use DCTagSDK API to develop their program and want to boot start by adding to /etc/rc.local. It can work fine by manual start, but can't work when reboot.

- **Answer:**

    Add two environment variables in front of the program in /etc/rc.local like below.

    Here are the two environment variables:
    export LD_LIBRARY_PATH=/home/sysuser/lib
    export TAGLINK_PATH=/home/sysuser
