<ul> <li>Collecting information</li> <li>Dynamic Update</li> <li>Preparing installation</li> <li>Installing Windows</li> </ul>	Your computer will be faster a more reliable	and
<ul> <li>Finalizing installation</li> </ul>	Files Needed	
Setup will complete in approximately: 39 minutes	The file 'asms' on Windows XP Professional Service   Pack 3 CD is needed.   Type the path where the file is located, and then click   OK.   Copy files from:   GLOBALROOT \DEVICE\CDROMONI385   The file 'asms' on Windows XP Professional Service   OK	a to shut down

Figure 1 asms error message

The error message is "The file 'asms' on Windows XP Professional CD-ROM is needed". For this particular problem to be solved, <u>Microsoft official website</u> provides some possible solutions. If none of them work, please modify the path in the prompt message as D:\i386 or any other disk label (A~Z). Your DVD-ROM should still be able to be found during installation process. Once you find the correct path, please copy it and click OK. One may have to do the same paste and OK step for around 20 times before the whole process has done.
