Category	■ FAQ □ SOP	Related OS	Win XPE & WinCE5
Abstract	The notification of ADAM-5053S used on ADAM-5560		
Keyword	ADAM-5053S, ADAM-5560		
Related Product	ADAM-5053S, ADAM-5560		

[Problem]

1. If you plug the older ADAM-5053S (before S/N: IAA6181993) on the slot 0 position of ADAM-5560, the component “U3” on the older ADAM-5053S will be broken by the component “L6” on ADMA-5560 backplane.

[Solution]

1. Don't plug the older ADAM-5053S (before S/N: IAA6181993) on the slot0 of ADAM-5560.
2. The ECOM-106401 of ADAM-5053S that modifies the U3/U4 location will be imported.
