Abstract	IAG_FAQ_ADAM-60XX & 62XX P2P Data Format		
Keyword	ADAM-60XX, ADAM-62XX, P2P		
Related Product	ADAM-60XX and ADAM-6200		

■ **Problem Description:**

This document demonstrates the data format of P2P implementation among ADAM-6000 and ADAM-6200 series.

■ **Brief Solution - Step by Step:**

In some applications, an industrial programmable controller might need to act like a “P2P Initiator”(i.e. by generating P2P command) and send out to “P2P Receiver (such as ADAM-6000/6200 IO Modules)” for controlling purpose.

In that case, the given user needs to know the exact data format of P2P command in order to program and interact with “P2P Receiver” accordingly

Attachment below is the data format of P2P command (i.e. bytes-by-bytes) for reference.
