■ Problem Description:

TCL_A sample code to get time before current time

■ Brief Solution:

Using TCL clock Function

If we want get the 15 Minute befor current time

The sample code :

```
set t [clock seconds] # return total minutes from 1970
```

```
set y [expr $t -15*60] #15 Minute = 15 * 60 Second
```

```
set x [clock format $y -format "%Y/%m/%d %H:%m:%d"]
```

```
#BWSPool "x:$x\r\n"
```
